smart procurement aims to leverage public buying power in pursuit of social environmental and innovation goals socially orientated smart procurement has been a controversial issue under eu law the extent to which the court of justice ecj has

supported or rather constrained its development has been intensely debated by academics and practitioners alike after the slow development of a seemingly permissive approach the ecj case law reached an apparent turning point a decade ago in the often criticised judgments in rüffert and laval which left a number of open questions the more recent judgments in bundesdruckerei and regiopost have furthered the ecj case law on socially orientated smart procurement and aimed to clarify the limits within which member states can use it to enforce labour standards this case law opens up additional possibilities but it also creates legal uncertainty concerning the interaction of the eu rules on the posting of workers public procurement and fundamental internal market freedoms these developments have been magnified by the reform of the eu public procurement rules in 2014 this book assesses the limits that the revised eu rules and the more recent ecj case law impose on socially orientated smart procurement and more generally critically reflects on potential future developments in this area of intersection of several strands of eu economic law
