The essays in this book set out to explore the ways in which Victorians used newspapers to identify the causes of bad behavior and its impacts and the ways in which they tried to distance criminals and those guilty of bad behavior from the ordinary members of society, including identification of them as different according to race or sexual orientation. It also explores how threats from within normal society were depicted and the panic that issues like baby farming caused. Victorian alarm was about crimes and bad behavior which they saw as new or unique to their period but which were not new then and which in slightly different dress are still causing panic today. What is striking about the essays in this collection are the ways in which they echo contemporary concerns about crime and bad behavior, including panics about new types of crime. This has implications for modern understandings of how society needs to understand crime, demonstrating
